No Recording

- Attendees/providers are **never** permitted to record (tape record or **any** other method) our educational events
- This applies to our webinars, teleconferences, live events and any other type of National Government Services educational events

Objectives

- Reduce duplicate claim submissions

Agenda

- How to Avoid Duplicate Submissions
- Proper Use of Repeat Modifiers
- Reopening Versus Redetermination
- Additional Documentation Request (ADR)
- Resources

Elements Compared to Identify an Exact Duplicate

- MBI or provider number
- From date of service
- Through date of service
- Type of service
- Procedure code
- Place of service
- Billed amount

Submitting Duplicate Claims

- May delay payment
- Increases administrative costs to the Medicare Program
- Could be identified as an abusive biller; or
- May result in an investigation for fraud if a pattern of duplicate billing is identified

Tip to Avoiding Denials

- Check your remittance advice for previously posted claim
- Verify reason initial claim was denied
- Don't just resubmit to correct a denial
- Use the IVR or NGSConnex to check on current claim status
- Allow 30 days from the receipt date
- Make sure your billing service/clearinghouse is waiting the appropriate time frame

Correct Process for Unpaid Claims

- Payment that has not been received after 30 days and there is concern follow the below steps
 - Verify claim status
 - Call the IVR system
 - Access NGSConnex
 - If IVR or NGSConnex cannot find the claim, call the PCC
 - Electronic submitters should check their EDI reports to verify which claims were received and accepted or rejected, contact

Duplicate Error Messages

- OA 18 – Duplicate claim/service
 - N20
 - Service not payable with other service rendered on the same date
 - N347
 - Your claim for a referred or purchased service cannot be paid because payment has already been made for this same service to another provider by a payment contractor representing the payer
- M86
 - Service denied because payment already made for same/similar procedure within set time frame

RARC	Description	Resolution
N20	Service not payable with other service rendered on the same date.	<p>Service not payable with other service rendered on the same date.</p> <p>The cost of care before and after the surgery or procedure is included in the approved amount for that service.</p> <p>An evaluation and management service has been billed during the global period.</p> <p>For a “major surgery” the global period is 90 days. Consult our Policy Education Topics/Global Surgery article to determine which (if any) of the situations described fits your scenario.</p> <p>If appropriate, request a reopening of your claim to append a modifier and/or correcting your procedure code or other details on the claim.</p>

RARC	Description	Resolution
N347	<p>Your claim for a referred or purchased service cannot be paid because payment has already been made for this same service to another provider by a payment contractor representing the payer.</p>	<p>Modifier 91 is used to indicate a repeat laboratory procedural service on the same day to obtain subsequent reportable test values. The physician may need to indicate that a lab procedure or service was distinct or separate from other lab services performed on the same day. This may indicate that a repeat clinical diagnostic laboratory test was distinct or separate from a lab panel or other lab services performed on the same day, and was performed to obtain subsequent reportable test values.</p> <p>Multiple laboratory services provided to a patient on one day by the same provider may appear to be incorrectly coded, when in fact the services may have been performed as reported. Because these circumstances cannot be easily identified, modifier 91 was established to permit claims of such a nature to bypass correct coding edits. The addition of this modifier to a laboratory procedure code indicates a repeat test or procedure on the same day.</p>

RARC	Description	Resolution
M86	Service denied because payment already made for same/similar procedure within set time frame.	<p>Physicians in the same group practice who are in the same specialty must bill and be paid as though they were a single physician. When more than one E/M service is provided to the same patient on the same date by more than one physician in the same specialty in the same group, only one E/M service may be reported unless the E/M services are for unrelated problems. Physicians in the same group practice but who are in different specialties or subspecialties may bill and be paid without regard to their membership in the same group.</p> <p><u>Evaluation & Management Documentation Training Tool</u></p>

Proper Use of Repeat Modifiers

Repeat Modifiers

- **Modifier 76**
 - Repeat procedure by the same physician
- **Appropriate use**
 - Same physician performs the services
 - On a procedure code in which quantity or number of units cannot be billed
 - List procedure code on the first line, and then again with modifier 76 (second line item)
 - Second line item will have the appropriate quantity billed amount
- **Inappropriate usage**
 - Do not add to each line of service
 - Do not use for repeat services due to equipment or other technical failure
 - Do not use for services repeated for quality control purposes

Repeat Modifiers

- **Modifier 77**
 - Repeat procedure by another physician
- **Appropriate use**
 - Add to the professional component of an x-ray or EKG procedure when
 - A different physician repeats the reading because another physician's expertise is needed
 - When the patient has two or more tests and more than one physician provides the interpretation and report
 - Add when billing for multiple services on a single day and the service cannot be quantity billed
- **Inappropriate usage**
 - Do not add when billing for multiple services considered bundled based on NCCI edits
 - Modifier 77 cannot be used with an E/M code

Example Modifier 76

- Example

- A provider received a duplicate denial on 1/22/2021 and on 1/31/2021 for CPT 71045 (chest x-ray) with billed date of service of 12/27/2020
- Both claims were billed for same patient, same provider, and same date of service, same charge, same CPT code, and same units, without a modifier

Repeat Modifiers

- **Modifier 91**
 - Repeat clinical diagnostic laboratory test to obtain multiple results
- **Appropriate use**
 - A subsequent medically necessary laboratory test on the same day of the same laboratory test
- **Inappropriate usage**
 - Due to testing problems for the specimen or testing problems of the equipment
 - Rerun of a laboratory test to confirm results
 - When the procedure code describes a series of test

Modifier 91

- CPT 82947 is performed twice on the same day

Billing Reminders

- Use the most appropriate modifier
- In some cases an anatomical modifier may be the most appropriate modifier
 - FA, F1-F9
 - TA, T1-T9
 - E1-E4
- Submit all services on the same claim
- Enter the number of services on the second line item (Units field or the electronic equivalent)
- Indicate different times of the day in Item 19 or the electronic equivalent

Modifiers 59/XE/XS/XP/XU

Distinct Procedural Service

- Procedure or service is distinct or separate from other services performed on same day, such as
 - Different session or patient encounter
 - Different procedure or surgery
 - Different anatomic site
 - Separate lesion
 - Separate injury

Modifiers 59/XE/XS/XP/XU

- Appropriate usage
 - Different session or patient encounter, different procedure or surgery, different anatomical site, or separate injury or area of injury
 - Medical record documentation indicates two separate distinct procedures performed on the same day by the same physician
 - Listed on the column one or column two code
 - Only when there is no other appropriate modifier to use
- Inappropriate usage
 - Code combination does not appear in the NCCI edits
 - Not be appended to an E/M service performed on the same date, see modifier 25
 - NCCI modifier table with a modifier indicator of “0”
 - Medical record documentation does not support the separate and distinct status
 - Exact same procedure code was performed twice on the same day, see modifier 76 or 77
 - A more appropriate modifier exists to identify the services

Modifiers 59/XE/XS/XP/XU

- Modifiers should NOT be used unless the proper criteria for use is met
- Documentation in the medical record must satisfy the criteria required by any NCCI PTP-associated modifier
- Modifiers XE, XS, XP, and XU were developed to provide greater reporting specificity
- Modifier 59 should only be used if no other more specific modifier is appropriate
- CMS allows modifier 59 or one of the X (ESPU) modifiers on a Column One or Column Two code

Modifiers XE/XS/XP/XU

- XE: Separate Encounter
- XS: Separate Structure
- XP: Separate Practitioner
- XU: Unusual Non-Overlapping Service
- Examples in Special Edition SE1418

Modifier 59 Example

- A biopsy was performed on the right arm (CPT 11100) and a lesion was removed from the right hand (CPT 17000)
- NCCI modifier indicator of 1
- Modifier 59 can be appended to either code (MM11168)

Medically Unlikely Edits

- MUEs are developed based on HCPCS/CPT code descriptors, CPT coding instructions, anatomic considerations, established CMS policies, nature of service/procedure, nature of analyte, nature of equipment, prescribing information and clinical judgment
- Established to reduce the paid claims error rate
- Automated prepayment edits
- Do not exist for all HCPCS/CPT codes
- Majority of the edits are publicly available
 - Some are confidential
- Edits are updated quarterly
- An MUE is the maximum units of service that a provider would report under most circumstances
 - Single beneficiary
 - Single date of service

Redetermination/Reopening

- Redetermination

- Analysis of documentation

- Coverage of furnished items and service
 - Medical necessity claim denials
 - Determination on limitation of liability provisions
 - Overpayment determinations

- Reopening

- Correct claim determination; minor errors

- Transposed procedure or diagnosis codes
 - Inaccurate data entry
 - Computer errors
 - Incorrect data items

Redetermination/Reopening

- Redetermination – First level of an appeal
 - Written
 - NGSConnex
- Reopening – Correction to minor, uncomplicated, provider or contractor clerical errors or omissions
 - Telephone
 - Written
 - NGSConnex

Telephone Reopening

- TRU reopenings may be done for
 - Assignment of claims (carrier errors only)
 - Adding/changing ordering/referring/supervising physician
 - Add/change rendering provider
 - POS Changes
 - CLIA certification denials
 - Duplicate denials
 - Medicare Advantage plan denials (clinical trial or hospice only)
 - Modifier GV and GW
 - Fee schedule corrections (carrier error only)
 - MBI corrections (carrier error only)
 - Patient paid amount (carrier error only)
 - MSP (Medicare now primary)
- All other requests need to be done through NGSConnex or in writing

REOPENING VERSUS REDETERMINATION

Understanding your next steps are very important for quick reimbursement and providers are required to know the difference between a reopening or a redetermination.

- **A reopening** is a reprocessing of a claim to fix minor mistakes.
- **A redetermination** is an examination of a claim that includes analysis of documentation.

Providers are encouraged to register for [NGSConnex EXT-2](#). Providers who are registered to use [NGSConnex EXT-2](#), should use this option to submit reopening requests electronically.

This guide distinguishes the differences between a reopening and redetermination. Please review and share this information with anyone in your organization who can benefit from this guide.

Resubmissions

- Inappropriate to resubmit claims
 - **Must submit a Reopening or Redetermination (depending on the modifier and denial) – DO NOT resubmit claim**
 - **Duplicate denial**
 - Find original denial message and correct billing
- Resubmission overwhelms payment systems
 - Do not set up auto rebills, work with vendor to reset

Additional Documentation Request Reminders

- ADR letters will include detailed instructions
 - Specific time frame to respond
 - Options for submission
 - Mailing
 - Mail the original (includes bar code) and retain a copy for your records
 - Fax
 - Some ADR letters will contain exact fax number
 - Fax to the exact number on the ADR
 - Faxing to an incorrect number will delay processing
- NGSConnex
 - Under My Claims tab
 - Review the list of all claims an ADR was issued
 - Check the status of a ADR

Additional Documentation Request Reminders

- Documentation will be reviewed from 30 to 45 days from the date the documentation is received
- Only send the documentation that is requested (unnecessary documentation will cause delays)
- Claims ADR – 30 days
- MR ADR – 45 days
