Disclaimer

National Government Services, Inc. has produced this material as an informational reference for providers furnishing services in our contract jurisdiction. National Government Services employees, agents, and staff make no representation, warranty, or guarantee that this compilation of Medicare information is error-free and will bear no responsibility or liability for the results or consequences of the use of this material. Although every reasonable effort has been made to assure the accuracy of the information within these pages at the time of publication, the Medicare Program is constantly changing, and it is the responsibility of each provider to remain abreast of the Medicare Program requirements. Any regulations, policies and/or guidelines cited in this publication are subject to change without further notice. Current Medicare regulations can be found on the CMS website.

No Recording

- Attendees/providers are **never** permitted to record (tape record or **any** other method) our educational events
  - This applies to our webinars, teleconferences, live events and any other type of National Government Services educational events

Agenda

- 2022 Medicare Part B CMS updates and guidelines
  - PA enrollment and billing
  - Split/Shared
  - Telehealth
  - Critical Care
  - NGS E/M billing instructions for PAs and NPs

Objectives

- Provide information on Medicare guidelines and 2022 updates pertinent to PAs
- Provide information on specific PA billing practices to reduce E/M claim denials and appeals
- Encourage access to NGS website for valuable reference information

Physician Assistants

- CMS Final Rule quotes 2021 CPT Codebook, p. 6, “When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and exact same subspecialties as the physician.”
- As of 1/1/2022, **PAs may bill the Medicare program** and be paid directly for their services in the same way that NPs and CNSs currently do
- As of 1/1/2022, PAs may reassign their rights to payment for their services, and may choose to incorporate as a group comprised solely of practitioners in their specialty and bill the Medicare program, in the same way that NPs and CNSs may do.

Physician Assistants

- What has stayed the same?
- CMS notes that **changes** for PA practice and billing rules **do not apply** to these previously established rules for PA services
  - the statutory benefit category for PA services, including the requirement that PA services are performed under **physician supervision** (see below)
  - the statutory payment percentage applicable to PA services

Physician Assistants

- PAs have flexibility to meet the statutory physician supervision requirement through collaborating with physicians and forming partnerships as long as this is in accordance with theirs state scope of practice laws
- In authorizing PAs to bill Medicare directly, CMS is encouraging PAs performance of more services under collaborative relationships with physicians. This is likely to enhance care opportunities for Medicare beneficiaries in rural and underserved communities where physician shortages impact access to care

PA Provider Enrollment

- PAs now planning to bill directly must update their enrollment status
- Must add: practice ownership details, practice address, medical record correspondence address, billing agency details if applicable
- Best reference: NGS website
  - Change Existing Provider Enrollment Information

Split (or shared) E/M Visits

- In the CY 2022 PFS final rule, CMS is establishing the following
  - Definition of split (or shared) E/M visits as E/M visits provided in the **facility setting** by a physician and an NPP in the same group
  - The visit is billed by the physician or practitioner who provides the substantive portion of the visit
  - **Effective 1/1/2022, Modifier FS required on all E/M services that have been performed on a Split/Shared**
  - Modifier FS may apply to E/M codes in the **hospital inpatient** (99221-99223 and 99231-99233) and **hospital outpatient** (99202-99205 and 99211-99215)

Split (or shared) E/M Visits

- **By 2023,** the substantive portion of the visit will be defined as more than half of the total time spent
- **For 2022,** the substantive portion can be history, physical exam, medical decision-making, **or** more than half of the total time
  - Exception: critical care, which can only be more than half of the total time
- Can be reported for new as well as established patients, and initial and subsequent visits, as well as prolonged services
- Modifier FS is required on the claim to identify these services to inform policy and help ensure program integrity
- Documentation in the medical record must identify the two individuals who performed the visit. **The individual providing the substantive portion must sign and date the medical record**

Telehealth

- Services originally added to the Medicare telehealth services list as a result of the PHE will be retained on a temporary Category three basis until the end of CY 2023
- This will allow stakeholders to analyze and consider permanent addition of these services

Telehealth

- Not changed: The geographic limitations for telehealth originating sites apply outside the circumstances of the PHE in most circumstances
- After the current PHE: Home will remain as an approved originating site **only for mental health services**

Telehealth

- After the PHE, mental health services will continue to be permissible with the patient's home as the originating site
- The mental health practitioner furnishing such telehealth services must have furnished both
  - an in-person, non-telehealth service to the beneficiary within the six-month period before the date of service of a telehealth service

  and

  - an in-person, non-telehealth service to the beneficiary must occur at 12-month intervals for subsequent care
- The practitioner must document any valid exception to this rule in the medical record

Telehealth

- To meet the F2F visit requirement relative to telehealth mental health services, a clinician's colleague in the same subspecialty and same group may furnish the in-person, non-telehealth service to the beneficiary if the original practitioner is unavailable
- Telehealth mental health services must be furnished via interactive telecommunication that includes both audio and visual two-way, real-time communication, with two exceptions described below
- An exception to audio-visual technology rule has been made for mental health services furnished by **practitioners who have the capability** to furnish two-way, audio/video communications, but where
  - the beneficiary is not capable of two-way audio/video technology
  - the beneficiary does not consent to the use of two-way, audio/video technology

Telehealth

- To meet the F2F visit requirement relative to telehealth mental health services, a clinician's colleague in the same subspecialty and same group may furnish the in-person, non-telehealth service to the beneficiary if the original practitioner is unavailable
- Telehealth mental health services must be furnished via interactive telecommunication that includes both audio and visual two-way, real-time communication, with two exceptions described below
- An exception to audio-visual technology rule has been made for mental health services furnished by practitioners who have the capability to furnish two-way, audio/video communications, but where
  - the beneficiary is not capable of two-way audio/video technology
  - the beneficiary does not consent to the use of two-way, audio/video technology

Telehealth

- CMS has approved two service-level modifiers to identify mental health telehealth services furnished to a beneficiary in their home via either two-way or audio-only communications technology
- CMS plans to release new modifiers to denote these services

Critical Care Services

- Critical care services are defined in the CPT Codebook, with listings of bundled services that are not separately payable
- When medically necessary, critical care services can be furnished concurrently to the same patient on the same day by more than one practitioner representing more than one specialty
- Critical care services can be furnished as split (or shared) visits. This means that a **physician and NPP** in the same group may split/share a critical care service

Critical Care

- Critical care services may be paid on the same day as other E/M visits by the same practitioner or another practitioner in the same group of the same specialty
  - The practitioner documents that the E/M visit was provided prior to the critical care service at a time when the patient did not require critical care
  - The visit was medically necessary
  - The services are separate and distinct, with no duplicative elements from the critical care service provided later in the day
  - Practitioners must report modifier -25 on the claim when reporting these critical care services

CMS MLN MM 12519

- MLN Matters® *MM12519:Summary of Policies in the Calendar Year (CY) 2022 Medicare Physician Fee Schedule (MPFS) Final Rule, Telehealth Originating Site Facility Fee Payment Amount and Telehealth Services List, CT Modifier Reduction List, and Preventive Services List*

NGS Initiative

- NGS is seeking solutions in areas of unnecessary provider burden
- Major finding through data analysis
  - Multiple same date of service E/M claims submitted by NPPs have high rates of denial and overturn on appeal
- NPP E/M claim submission, payment, denial and appeal patterns
- Some current users continue to see denials, often based on use of the same diagnosis on both claims

E/M Golden Rule and Facts

- CMS permits one E/M service per beneficiary per date of service for each provider specialty
- NPs (Specialty 50) and PAs (Specialty 97) are now working in full scope of sub-specialty groups
- When NPPs are working in a physician group, they are considered as working in exact same specialty or subspecialty as physicians in the group

NPP E/M Billing Issue

- Issue
  - High rate of denial, frequently overturned with documentation on appeal
  - Denials and appeal process is burdensome and costly to both the providers and NGS

Solution

- Applies to all NPP E/M claims
- NPPs add specialty of the group in which the service was rendered
- NPP E/M claims: NPP is rendering provider and includes physician specialty info in loop 2400 NTE segment
- Repeat claims for same day and new patient services will suspend for comparison with paid claims in history
  - NGS claim examiners compare specialty information with paid history claim(s); claims may be allowed when both specialty information and diagnoses are different

Important Claim Facts

- NPP E/M claims submitted without specialty information in loop 2400 NTE segment will continue to deny when an E/M claim has been paid to another group member NPP
  - on the same date of service or
  - a new patient visit has been paid to an NPP within three years
- **Primary diagnoses** on claims must vary, supporting care for two different clinical conditions

Anticipated Outcomes

- **Significant decrease** in rate of denial on E/M claims submitted by NPPs
- **Significant decrease** in rate of appeals, correlative to the lower denial rate
- **Significant increase** in provider revenue

Helpful Information

- What is the reference for the root of this issue in the IOMs?
  - CMS IOM Publication 100-02, *Medicare Benefit Policy Manual*, Chapter 15 Section 30
- Can you tell us the denial message and remark code used for concurrent care?
  - D984= Coverage/program guidelines were not met
  - N20= Service not payable with other service rendered on the same date
- Where can one find the list of specialty codes?
  - NGS Website > Enrollment > Helpful Tips > Medicare Provider/Supplier Specialty Codes

Thank You!

- Follow-up email
  - Attendees will be provided a Medicare University Course Code
