# **Hospice Claim Submission**

## **Background**

Individuals who are entitled to hospital insurance (Part A) and have a terminal illness (with a life expectancy of six months or less) have the option of electing hospice benefits for treatment and management of their terminal condition. An eligible individual (or his authorized representative) must elect hospice care to receive it by filing a signed election statement with a particular hospice. Once an eligible individual elects hospice, the hospice submits a Notice of Election (NOE) to the Medicare Contractor, which transmits the information to the Common Working File (CWF). Once the initial election is processed, the CWF maintains the beneficiary in hospice status until death or until an election termination is received.

The NOE should be filed as soon as possible after a patient elects the hospice benefit. By submitting the NOE timely, other providers will see that the patient is in the Medicare hospice benefit. This helps to avoid inappropriate billing to Medicare contractors by non-hospice providers, and can help to avoid inappropriate billing by other hospices.

The NOE must be submitted and processed prior to submitting the first hospice claim to Medicare. Once the NOE is processed, the hospice can begin submitting claim(s) to National Government Services for payment.

## **Hospice Claims**

(status/location T B9997).

Hospice claims must be submitted and processed sequentially (date of service order). This requirement is essential to the correct processing of Medicare hospice claims. Hospice claims must be matched by Medicare systems to the appropriate 90-or 60- day hospice benefit period in order to be paid. Edits are in place to prevent acceptance of an out-of-sequence claim. If there is no prior claim in the system, the claim will be returned to the provider (RTP'd). If there is a prior claim that has been received but has not been finalized (location B9997), the system will hold the out-of-sequence claim until the prior claim is finalized. Sequential billing also ensures that there is no gap in days between the prior claim's "To" date and the subsequent claim's "From" date. Any gap in service dates will cause the claim to move to the RTP file

Medicare regulations also state that hospices must submit claims on a monthly basis for patients that remain on service through the last day of the month. Monthly billing must conform to a calendar month (i.e. limit services to those in the same calendar month if services began mid-month). Hospices submitting more than one claim in a calendar month for the same beneficiary will have claims returned.

The monthly billing requirement applies even if the patient is discharged, revokes, or expires on the first of the next calendar month. For example, if a patient is admitted to hospice on August 8th and revokes the benefit on September 1st, the hospice must submit two claims. A claim is submitted for dates of service August 8 to August 31and a separate claim is submitted with dates of service September 1 to September 1.

**NOTE:** Valid values that are specific to hospice billing are provided below; however, the National Uniform Billing Committee (NUBC) maintains the UB-04 data element specifications and revenue code tables. They may be contacted for subscription to the UB-04 at the following link: http://www.nubc.org.
