National Government Services Medicare Part B 2025 Spring Virtual Conference

Understanding Medicare Compliance for Part B Providers

Being Medicare compliant involves a comprehensive commitment from healthcare providers to meticulously adhere to a broad range of Medicare regulations. This diligence spans all aspects of healthcare delivery, ensuring that every process, from the accuracy and thoroughness of medical documentation to the strict adherence to various Medicare policies, meets the required standards. It requires continuous education, internal audits, and a responsive system to adapt to regulatory updates. In essence, Medicare compliance is about integrating regulatory adherence into the very fabric of healthcare operations, ensuring the highest level of care and accountability.

During this three-day virtual conference, we’re offering compliance guidance to assist our providers in understanding policies related to various topics including incident to provisions, correct coding and sufficient documentation, proper administration of the ABN, using appropriate modifiers to avoid claim denials and much more. Each session will begin with a presentation, then we’ll address your questions.

Registration for these free sessions is available on our website, NGSMedicare.com, under the [Events](#) tab, or you may register below. All webinars are held in eastern time (ET). You may register for as many as you’d like.

Day 1 – Tuesday, 6/3/2025

Since a MAC is presenting this information, all webinar attendees will be eligible to receive 1 CEU with the AAPC per hour of education if you are a CPC. Please remember, if you will be reporting CEUs to the AAPC you will need to keep your email registration confirmation and follow up email as proof of session for any future AAPC audit. If you do not have a registration confirmation in your name, you will not be able to report CEUs with the AAPC.
